

PRICE BEAT POLICY

At Priority Waste, we are committed to delivering a high-quality, compliant service at a commercially competitive rate.

Where appropriate, we will review any genuine like-for-like quotation and aim to provide a more competitive alternative — typically targeting an improvement of up to 10%.

Eligibility Criteria

To be considered under our price beat policy, the following must be provided:

- A formal written quotation from a recognised UK waste management provider
- A like-for-like scope of works (including waste type, volumes, packaging, location, and service requirements)
- The quotation must be provided in its original format, including:
 - The original email from the supplier
 - The full email conversation (where applicable)
 - Any attachments issued alongside the quotation

How to Submit a Valid Quotation

To ensure the quotation can be reviewed, it must be shared in a way that preserves the original format and content.

For example:

If you receive a quotation by email from another supplier, please either:

- Reply to us and copy the full email chain into your response, ensuring the original message content is clearly visible, or
 - Copy the full email thread (including headers and content) into a new email and send it to us
-

What We Cannot Accept

To maintain a fair and consistent process, we are unable to accept:

- Forwarded emails
- Screenshots of pricing
- Copied and pasted summaries of quotations
- Standalone PDF attachments without the original email context
- Recreated or manually presented quotations

This ensures all quotations can be reviewed accurately and consistently.

Commercial Considerations

- This is a price beat policy, not a guaranteed price match or beat
 - All opportunities are subject to technical, operational, and compliance review
 - We will not compromise on safety, legal obligations, or service standards to achieve a lower price
-

Our Approach

Where all criteria are met, we will review the quotation and aim to provide the most commercially competitive solution possible, without compromising on quality or compliance.
